## 12056 1/12 Porsche 934 Vaillant (with Photo-Etched Parts)

Following on from the re-issue of the Jägermeister-sponsored 934 (Item 12055), we are delighted to announce its Vaillant livery cousin's debut in the 1/12 Big Scale Racing Cars series. From 1976, the commercially sold race car Porsche Turbo RSR was used in World Sportcar championship races. As it was to be used in Group 4 GT class and the 930 Turbo was its base, it was called the 934. Its 2,993cc flat-6 turbo-charged engine thumped out an impressive 485hp with 62kg/m of torque. One of the 934 racecars was run in the 1976 DRM (German Racing Championship) by Kremer Racing. The cobalt green car took three victories that season, carrying driver Bob Wollek to the top of the Division 1 drivers' standings

- This is a 1/12 scale plastic assembly model kit. Length: 360mm, width: 168mm.
- This kit features the same slick tires as used in Item 12055.
- The impressive form with parts such as the large-sized front bumper spoiler and the widened over fenders is accurately reproduced.
- Left and right doors and front and rear hoods are openable.
- Flat-6 turbo engine's cables, cords, and piping provide a top quality finish.
- The rack & pinion arrangement enables moveable front wheels linked with the steering wheel.
- Moveable front and rear suspension features coil spring dampers.
- Spartan interior with roll-cage is precisely reproduced.
- Photo-etched parts depict brake discs, catch pins, side radiator, and seatbelt for the ultimate finish.
- Sponsor and car number decals are produced by Cartograf.

## 14136 1/12 Kawasaki Ninja H2 Carbon

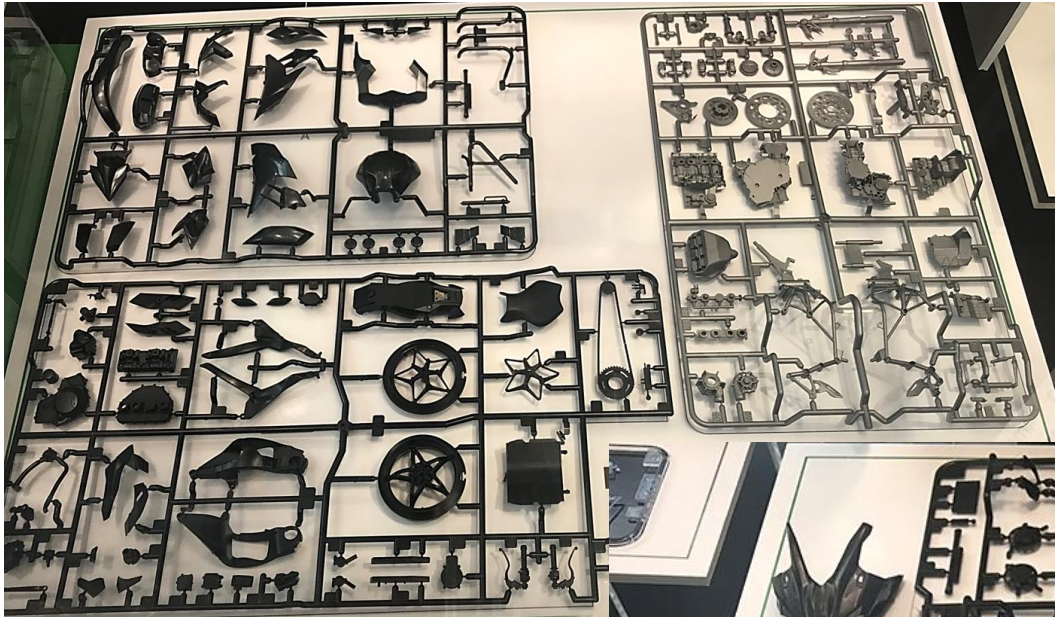

Tamiya is delighted to introduce the latest model in our long-running 1/12 Motorcycle Series, which depicts the Ninja H2 Carbon. The bike is a top spec model in the Ninja H2 range (road-going cousins of the H2R circuit bike depicted in our Item 14131) available from 2017, with exclusive carbon fibre upper cowl, enhanced 205hp engine, Öhlins rear shock unit, and other upgrades to the extensive electronic driver aids. It truly is a mouth-watering prospect for fans of seriously powerful motorcycles, and is set to gain even more street cred with a rumoured appearance in next year's **Top Gun 2** movie

- This is a 1/12 scale plastic model assembly kit. Length: 174mm, width: 76mm, height: 96mm.
- Features one each of new black, clear and metal-plated parts sprues.
- The model depicts a 2018 spec version of the road going Ninja H2 Carbon with superb accuracy: turn signals, larger silencer, rear license plate, side mirrors, and altered designs for the upper cowl, headlights, wind screen and more are all faithfully rendered.
- A dedicated sticker sheet includes carbon fibre pattern pieces to adorn the upper cowl.
- Liquid-cooled inline-4 engine and supercharger are depicted in fine detail.
- Accurate recreations of the aggressive road bike spec cowl lines capture the essence of the bike in style.
- Cowls, engine and swing arm are attached using minute screws.
- Metal-plated parts recreate exhaust, muffler and catalytic converter.
- Metal transfers are included for the Kawasaki river mark emblem.
- Masking stickers are included to help with the paint job on the two-tone fuel tank

# 24353 1/24 Mazda MX-5 RF

Tamiya is delighted to announce a new stablemate for the popular MX-5 (also known as the Miata MX-5 in the US and Roadster in Japan) model Item 24342! This kit recreates the RF model that was originally announced by Mazda in 2016: the initials stand for Retractable Fastback, as the car features a sleek fastback hardtop design with innovative retractable roof.

The actual car's three-piece roof opens and closes in just thirteen seconds, and all at the push of a single button. It also features tweaks to its chassis and suspension to accommodate the heavier top section, while retaining all of Mazda's vaunted safety features

## MAZDA ROADSTER RF

1/24 SPORTS CAR SERIES ■ HIGHLY DETAILED STATIC DISPLAY MODEL  
■ DYNAMIC FORM ACCURATELY CAPTURED ■ CHOOSE ROOF UP OR DOWN  
■ METAL TRANSFERS GIVE AN EXTRA LEVEL OF DETAIL  
■ READY TO ASSEMBLE PRECISION MODEL KIT  
■ DETAILED SCALE MODEL FOR HOBBYISTS AGE 14 AND ABOVE  
THIS IS NOT A TOY ■ COMPONENT AND PAINT NOT INCLUDED  
\*MODEL MAY VARY FROM IMAGE ON BOX

MAZDA MX-5 RF

1/24  
SCALE

- This is a 1/24 scale plastic model assembly kit. Length: 164mm, width: 80mm.
- The kit depicts the 2017 model MX-5 RF, complete with options available on top grade models in the Japan market such as Recaro seats, and BBS wheels.
- Modellers can choose to assemble the kit as Japanese, US, UK or European market spec, and have the option of depicting the hard top up or down, thanks to new roof and rear/side window parts.
- Features detailed renditions of the suspension and interior.
- Metal-plated parts are used to depict light reflectors and other components.
- Decals are included for instrumentation and other details, as are metal transfers for emblems and side mirror surfaces.

 **TAMIYA**

# 24021 1/24 Toyota Celica XX 2800GT

**LIMITED RELEASE**

Tamiya is delighted to announce this re-issue of a classic from 1981, with updated decals and 4-language cover story. The Celica XX (known as the Supra outside of Japan) was a legendary sports car, and the XX 2800GT was its second generation model. A 2.7-liter engine, front MacPherson suspension and aerodynamically-efficient body made the car a joy to both look at and drive, and fans flocked to its door

## TOYOTA CELICA XX 2800GT

- This is a 1/24 scale plastic model assembly kit.
- The classic wedge-shaped body design of the 1981 model year Celica XX 2800GT is captured in style.
- Interior features details such as separate seat parts and centre console with individual gearshift and parking brake components.
- There is plenty to look at on the model underside, with separate depictions of the exhaust, front MacPherson and rear semi-trailing suspension setups.

- Retractable headlights are moving parts.
- Includes a driver figure, and metal-plated depictions of wheels.
- Decals are included for decoration of the model.

- Please note that this kit does not include parts for motorization or the Yamaha Beluga moped, which were in the original 1981 release

 **TAMIYA**

## 24033 1/24 Toyota Celica Supra Long Beach GP Marshal Car

This is a welcome re-issue of a classic kit from way back in 1983, which depicts a special version of the Celica Supra that was used as the marshal's car in the 1982 Formula One race held in Long Beach, California, USA.

Its tuned engine produced 230hp and a top speed of over 230km/h, and the car made for a thrilling sight as it bombed around the circuit, thanks to stylish over fenders and a sporty rear spoiler

**LIMITED RELEASE**

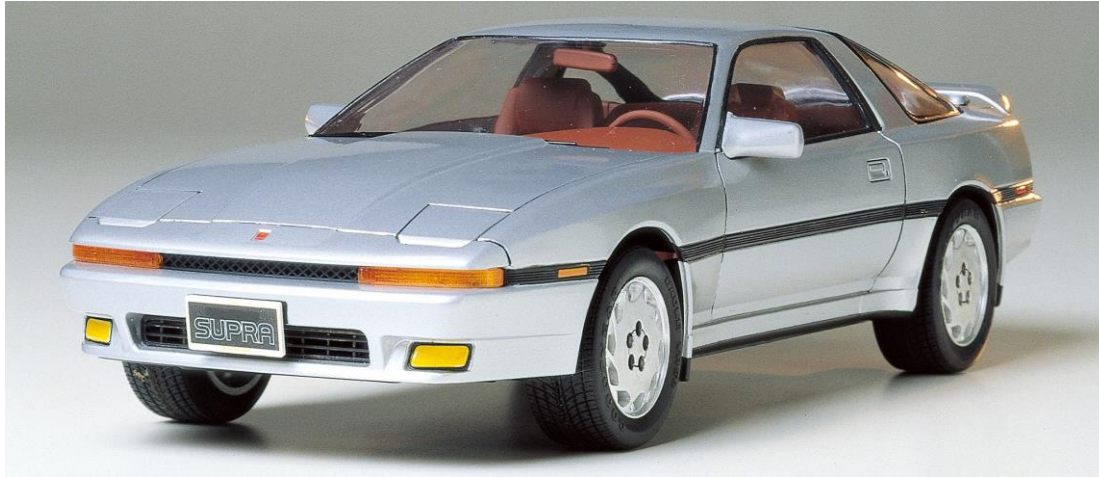

- This is a 1/24 scale plastic model assembly kit.
- The wedge-shaped body is recreated in style, with depictions of the roof-top lights, rear spoiler and exaggerated over fenders.
- Dedicated decals include depictions of the side slogan and other markings.
- Interior features details such as separate seat parts and centre console with individual gearshift and parking brake components.
- There is plenty to look at on the model underside, with separate depictions of the exhaust, front MacPherson and rear semi-trailing suspension setups.

- A driver figure is also included to raise the level of detail.
- Please note that this kit does not include parts for motorization or the Yamaha Beluga moped, which were in the original 1981 release

# 24062 1/24 Toyota Supra 3.0GT Turbo

**LIMITED RELEASE**

This is a re-issue of another classic Toyota car kit, which originally debuted back in 1986, and its first re-issue in nine years. It depicts the Supra which made its bow in Japan back in February 1986, with the top of the line 3.0GT Turbo model featuring a 2,954cc 6-cylinder engine with turbo intercooler, an aerodynamically honed body that had a drag coefficient of just 0.32, and hi-tech suspension with stabilizer bars for superlative road holding

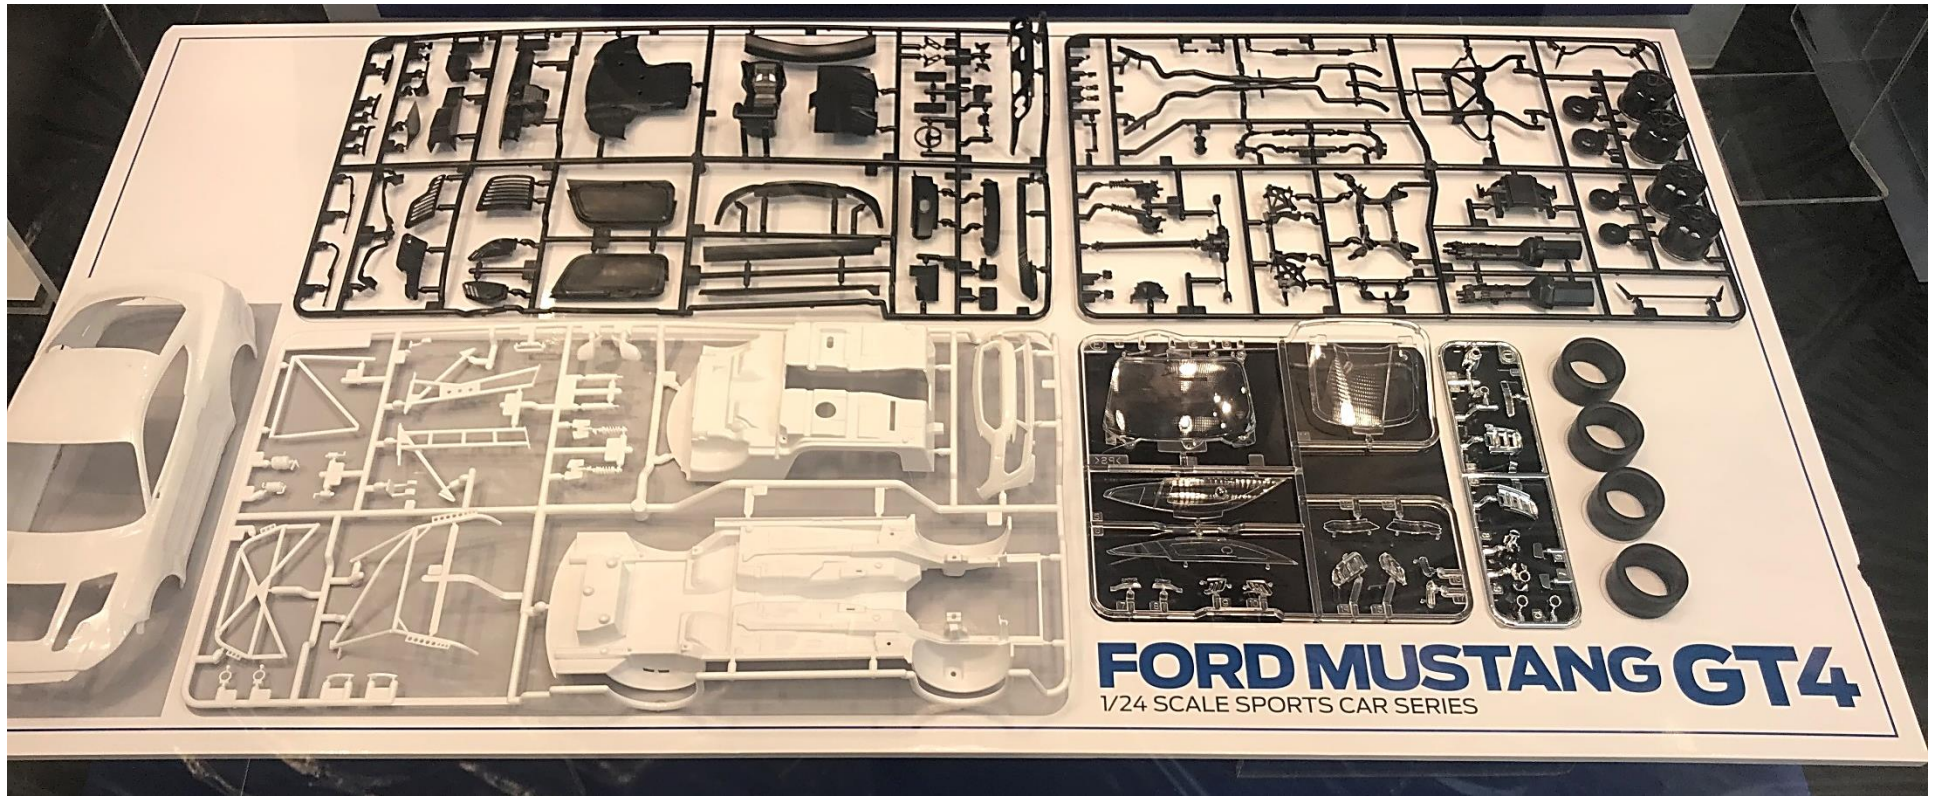

- This is a 1/24 scale plastic model assembly kit.
- The wedge-shaped Supra 3.0GT Turbo form is captured in style.
- Features updated decals and masking stickers, plus an updated instruction manual and a re-written version of the four-language cover story.
- The model can be assembled to depict a left- or right-hand drive car, with dedicated steering wheel and parking brake positions, plus different parts for U.S. and Japan market side mirrors.
- Clear parts recreate head- and taillights.
- Synthetic rubber tires feature realistic texture, and authentic tread patterns.

## 24354 1/24 Ford Mustang GT4

Tamiya is delighted to announce the appearance of the muscular Ford Mustang GT4 in the long-running 1/24 Sports Car Series! The actual car is a race-ready powerhouse featuring honed aerodynamic form with front spoiler, rear wing and diffuser, high performance brakes, lightweight carbon fibre vented engine hood, roof, door panels and more, plus a big 5.2-liter V8 engine in the front. This model recreates the 2019 spec car.

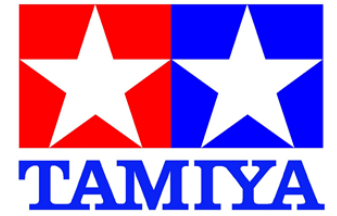

- This is a 1/24 scale plastic model assembly kit. Length: 203mm, width: 81mm, height: 60mm.
- The powerful form of the 2019 spec Mustang GT4 is captured in style, thanks to the extensive time spent with a real car by our designers.
- Engine hood air intake designs are captured in style, contributing to the overall muscular look of the car.
- The underside features depictions of the complex suspension and visible engine sections.
- A realistic interior has renderings of the dedicated steering wheel, console panel, roll cage and racing seat.
- Separate parts for lights help streamline the painting process.
- Comes with decals to recreate either a gun metal colour no.17 car, or a white no.18 car. Masking stickers are also included.
- Includes metal-plated depictions of side and rear view mirror surfaces.

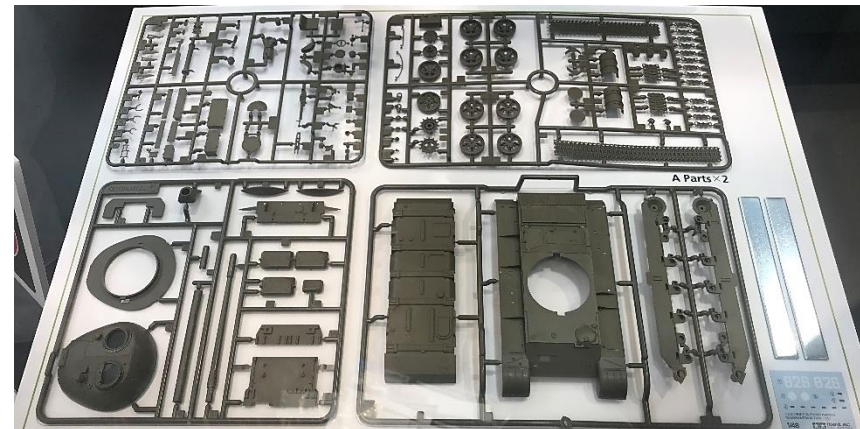

## 32598 1/48 Russian Medium Tank T-55

The latest addition to the ever-growing 1/48 Military Miniature Series, creates the mass-produced masterpiece T-55 medium tank that not only provided a base for later T-62, T-72 and T-80 designs still in use today, it spurred Western rivals on and contributed to the great East-West arms race of the Cold War. Its 100mm gun compared favourably with the West's 90mm counterpart, and with HEAT rounds could defeat up to 390mm of armour. The T-55 was produced in the USSR, and under license in Czechoslovakia and Poland, and supplied to Soviet countries and clients worldwide – it even faced off against U.S.-designed M48s and M60A1s in the Middle East

- This is a 1/48 scale plastic model assembly kit. Length: 190mm, width: 69mm.
- The low, refined T-55 form with hemispherical turret and 100mm gun is captured artfully in compact 1/48 scale.
- Features authentic recreations of weld lines and cast turret surfaces.
- The 100mm main gun and anti-aircraft machine gun give a realistic finish.
- Assembly type tracks have single piece straight sections.
- Comes with a commander torso figure surveying the scene in front, and decals to create a single marking option.

# 25196 *1/35* U.S. M8 Light Armoured Car “Greyhound” Combat Patrol Set

**LIMITED RELEASE**

This is a limited release which pairs the popular M8 “Greyhound” armoured car kit (Item 35228) with an existing figure and accessories, plus a sheet for creating new ration cartons – great for creating a mini-diorama straight out of the box. The speedy Greyhound was capable of nearly 90km/h and could defend itself too, with a turreted 37mm gun and armour between 10 and 25mm thick. Astonishingly for a vehicle that saw its service debut in 1943, the M8 still serves some militaries in the current day

- This is a 1/35 scale plastic model assembly kit. Length: 143mm.
- A newly-created sheet depicts the 10-in-1 ration that nourished U.S. troops in the second half of WWII.
- Includes parts for a figure from Item 35347, which depicts a tanker lugging a large case. Also included, of course, is the original commander figure from Item 35228.
- Includes plenty of accessories from Item 35229, such as a variety of jerry cans, buckets and oil drums, plus canvas bags and sacks that will add lots of life to your model.
- Parts recreating the M1919 are used from Item 35360.
- A supplementary instruction sheet includes ideas for positioning of accessories and figures.

# 35049 1/35 Russian Tank T34/76 1942 Production Model

## LIMITED RELEASE

This is a first re-issue since 2011 for this 1/35 Military Miniature series kit of the 1942 production model of the famous Russian Tank T34/76, which proved to be effective against German tanks during WWII. It was fitted with an L/41.2 76.2mm main gun, a powerful diesel engine, and a large commander's hatch on the turret. Its wide tracks enabled great mobility in snow or muddy terrain. The design would eventually evolve into the T34/85 tank that was itself a symbol of the successful Soviet fight against the Axis powers in WWII

- This is a 1/35 scale plastic model assembly kit.
- The refined form with sloped armour and low, compact turret is depicted in style.
- Rough cast armour faces and weld lines have an authentic finish.
- Driver's hatch can be depicted in either open or closed position, and features reverse side detailing.
- Turret and gun are moving parts.
  - Comes with a range of accessories including unditching logs, tool boxes, spare track links, fuel tanks and more.
- Belt-type components are used to recreate tracks.
- Decals are included with numbers and slogans for a choice of a number of different units' tanks.
- Driver and commander torso figures are included

# 35138 1/35 T34/85 Russian Medium Tank **LIMITED RELEASE**

This veteran 1/35 Military Miniature series kit gets a first re-issue since 2018; it recreates the T34/85 tank which Soviet designers dreamed up to take on the formidable German Tiger and Panther tanks. It was given a powerful 85mm main gun and a 3-man turret enclosed by heavy cast-iron armour, while the hull featured sloped armour. This tank not only featured in WWII, but was also delivered to the Soviet Union's allies in the post-war era, fielded in the Korean War by the North's Korean People's Army

- This is a 1/35 scale plastic model assembly kit. Length: 235mm, width: 88mm.
- The T34/85 form with sloped hull armour is faithfully recreated, including renderings of the rough cast iron finish characteristic of Soviet tanks. Weld joints are also accurately recreated.
- links.

- Features moveable long-barreled 85mm main gun.
- Gunner's rail on hull and other details are depicted using separate parts.
- Belt-type parts give an accurate and fuss-free recreation of the tracks.
- Includes accessory parts such as fuel cans and spare track

- Commander and gunner hatches are openable.
- Comes with marking options to recreate four WWII tanks and one in the Korean War:
- Marking Option 1: April 1945, Berlin (No.204); Option 2: Jan. 1945, Eastern Prussia (No.236); Option 3: July 1944, Minsk (No.145); Option 4: April 1945, Berlin (No.341); Option 5: 1950, Korea (No.321).

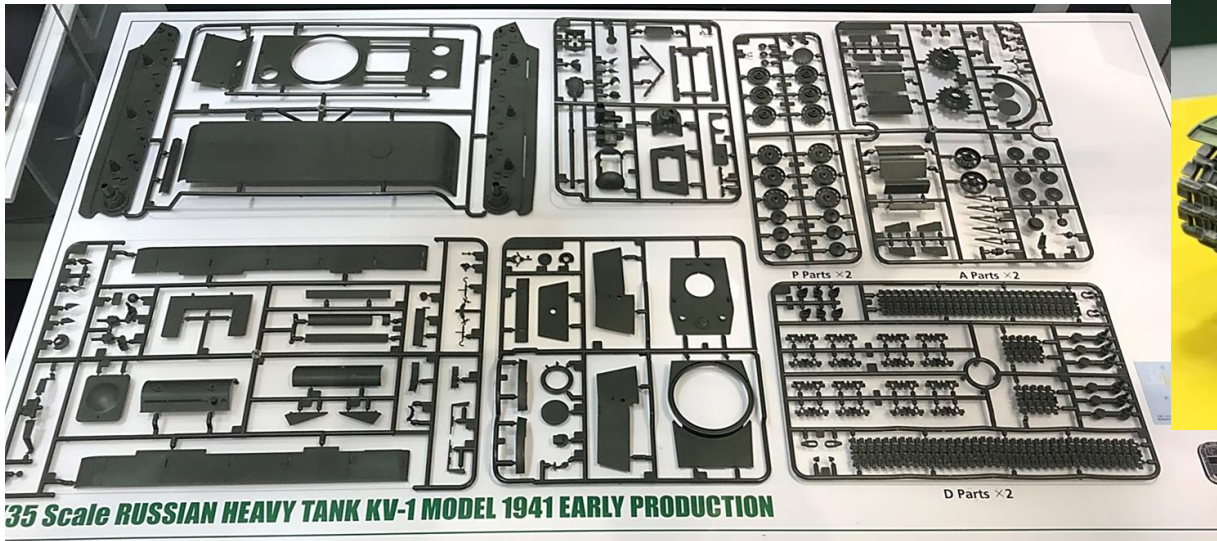

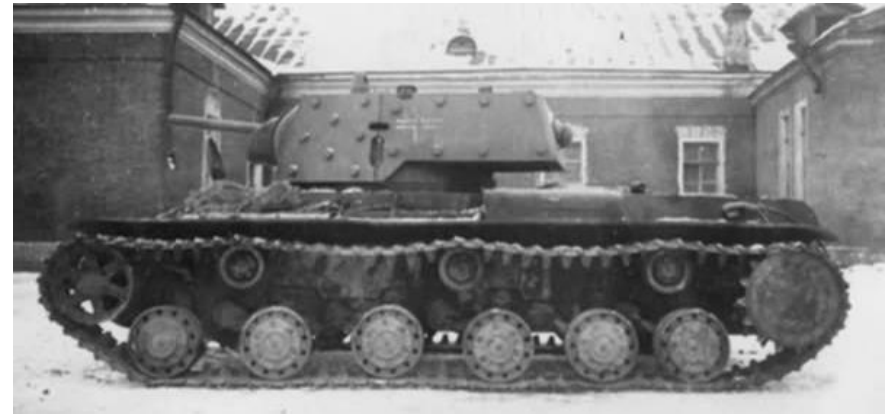

# 35372 1/35 Russian Heavy Tank KV-1F Model 1941 Early Production

The highly extensive 1/35 Military Miniature Series welcomes another Soviet subject. This is an important design in the history of armour, and was developed concurrently with the T-34 medium tank. Armed with a powerful 76.2mm ZIS-5 gun and continually updated to improve its survivability, it served through to the end of WWII.

- This is a 1/35 scale plastic model assembly kit.
- An early 1941 model is depicted, the distinctive bulky form captured in style.
- This is a completely new design, with no parts brought over from previous kits.
- Early 1941 features such as welded turret and early production road wheels are accurately rendered.
- Authentically reproduces surface textures such as the rough Soviet steel plate and cast areas, with weld lines also depicted.
- Driver and gearbox hatches, plus fender-top stowage cases can be assembled open or closed.
- Turret ring is accurately captured without using a complex parts breakdown.
- Assembly type tracks feature one-piece straight sections and recreate upper run “sag” in style.
- Comes with two marking options and a single commander torso figure

1:35 Scale RUSSIAN HEAVY TANK KV-1 MODEL 1941 EARLY PRODUCTION

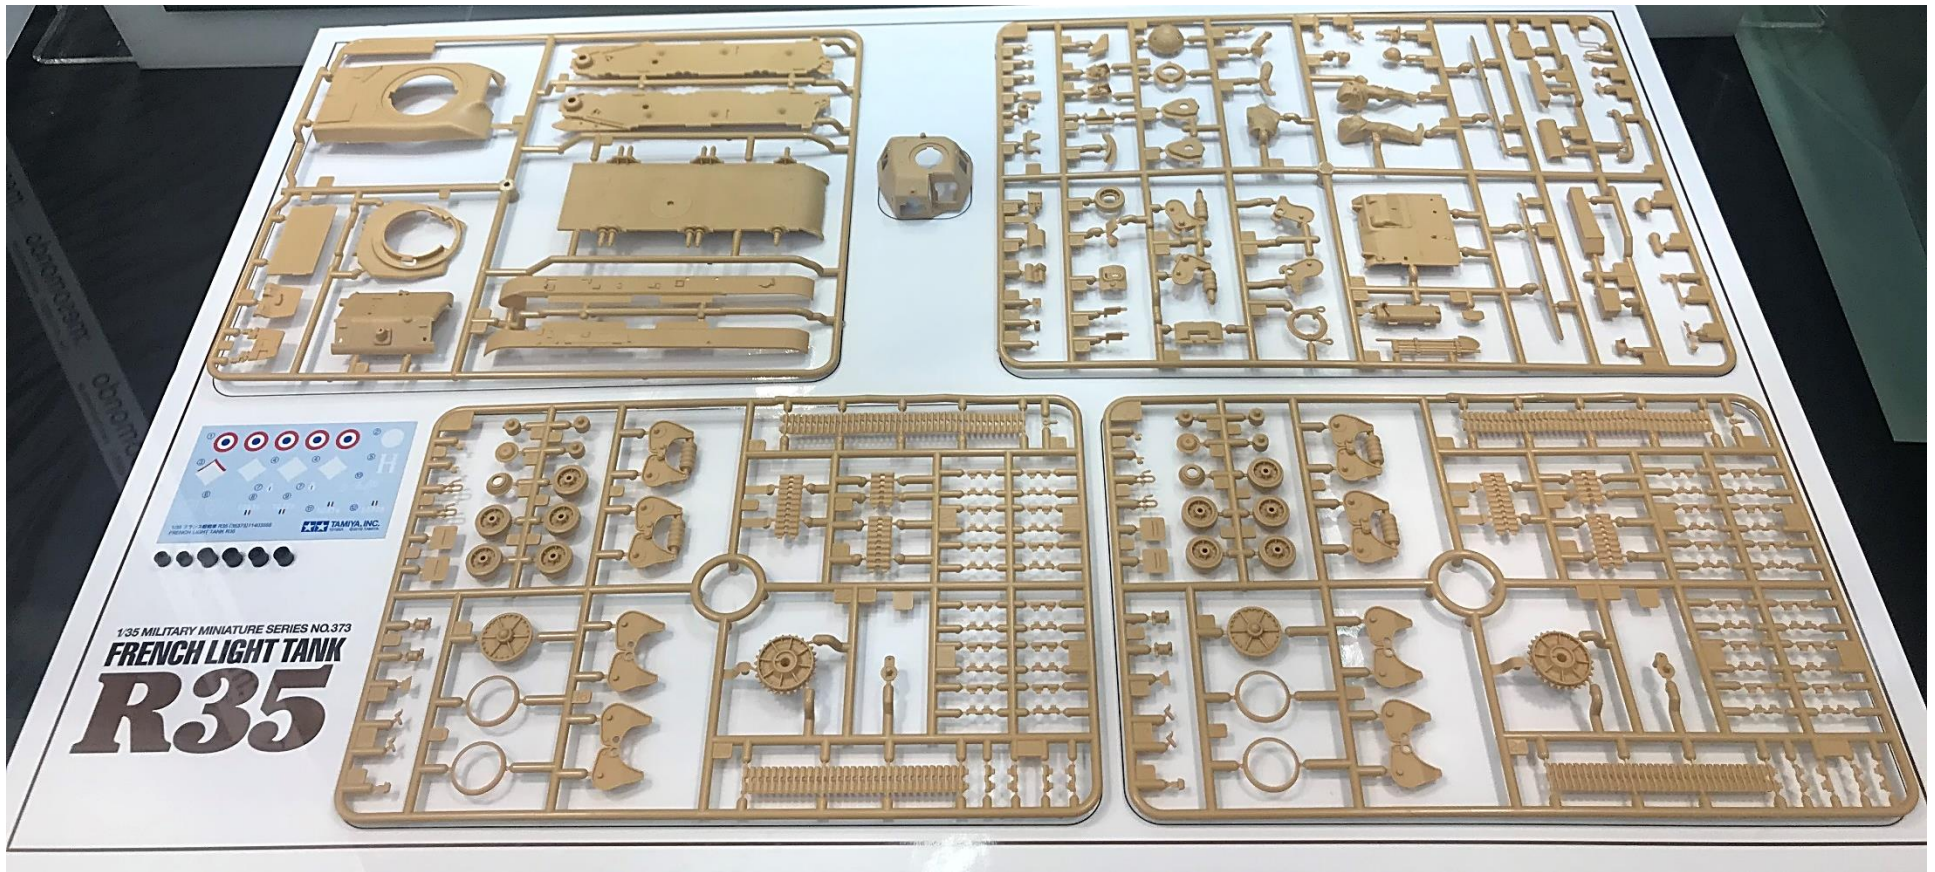

Tamiya's French tank model kits have become well known for their unique subject matter and superb historical accuracy. This kit recreates the R35. It was originally designed as a successor to the late-WWI Renault FT, and inherited its 37mm gun, paired with a cast turret and three-piece bolted cast hull. Around 1,500 were manufactured after its official adoption in 1935; they were one of the main pillars of the French attempt to resist the German onslaught during the Fall of France in May/June 1940.

## 35373 1/35 R35 FRENCH LIGHT TANK

- 1/35 scale plastic model kit. Length: 114mm, width: 55mm.
- The 37mm gun offers elevation and (as on the actual R35) 5 degrees of traverse to either side.
- Assembly type tracks allow fuss-free depiction of upper run 'sag.' They feature one-piece straight sections.
- Comes with two marking options, and a figure perched on the hatch in the turret rear.
- Colour painting tank guide included which aids with recreation of the intricate French camouflage pattern.

# FRENCH LIGHT TANK R35

## 37028 1/35 West German Tank M47 Patton

This kit is the latest addition to the Tamiya-Italeri Series, and sees a significantly updated version of the veteran Italeri M47 Patton combined with Tamiya figure and machine gun parts, plus new West German markings and parts, as well as Tamiya instructions and package!

The M47 Patton began deployment in 1952, but was rather quickly superseded by the M48; M47s were thus supplied by the U.S. to friendly nations in the west such as Italy and West Germany.

- This is a 1/35 scale plastic model assembly kit.
- The form of a late production M47 is captured in style, with plenty of upgrades and new parts to bring it in line with modern standards.
- Major changes: Weak part joins have been strengthened; omitted details such as the canvas gun shield cover, tow cables and more have been added; parts such as the periscope guard and machine gun have more accurate shape.
- Features new individual parts to depict West German smoke dischargers and Jerry cans.
- Plastic plate is included to recreate the late production M47 rain guard.
- Tracks are now recreated by paint- and cementable belts.
- Includes Tamiya torso figure and parts for the M2 heavy machine gun, ammunition cases and more.
- Comes with two marking options, for West German and Austrian vehicles.
- M47 parts are a product of Italeri

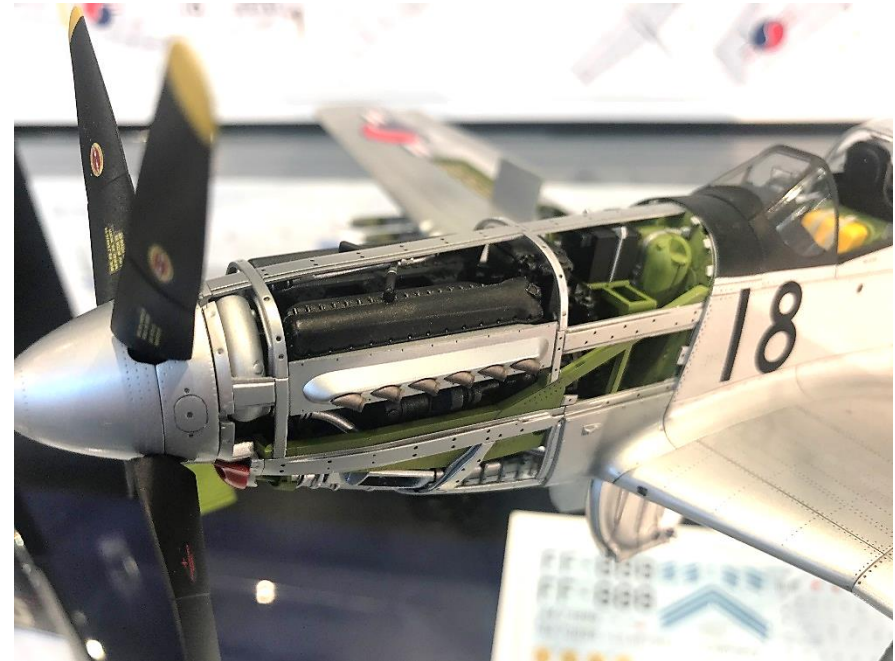

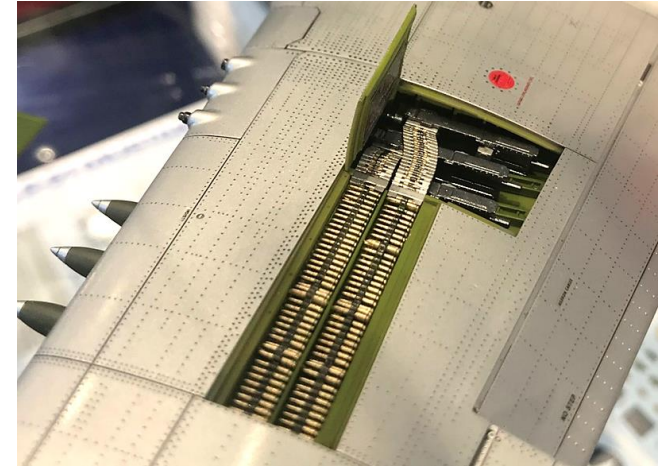

# 60328 1/32 North American F-51D Mustang - Korean War

Considered by many the most capable WWII fighters, the Mustang was also active in the Korean War, and this model creates one such F-51D. It is a welcome first release in the dramatic, highly detailed 1/32 Aircraft Series for over two years. Renamed from the P-51D to the F-51D to go along with the creation of the US Air Force, the Mustang seemed set for gradual retirement as the jet aircraft took centre stage. With the outbreak of hostilities on the Korean peninsula, however, that all changed. United Nations forces were hard pushed in the early stages of the war, and USAF P-80s were unable to land in areas where there were frequently no proper runways. The F-51D stepped in and performed admirably in a ground attack role as the United Nations forces pushed back

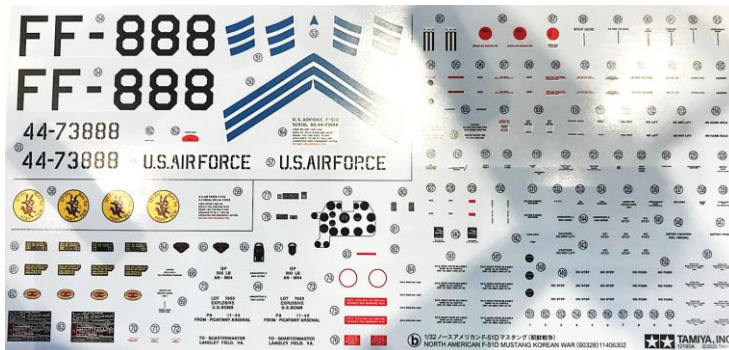

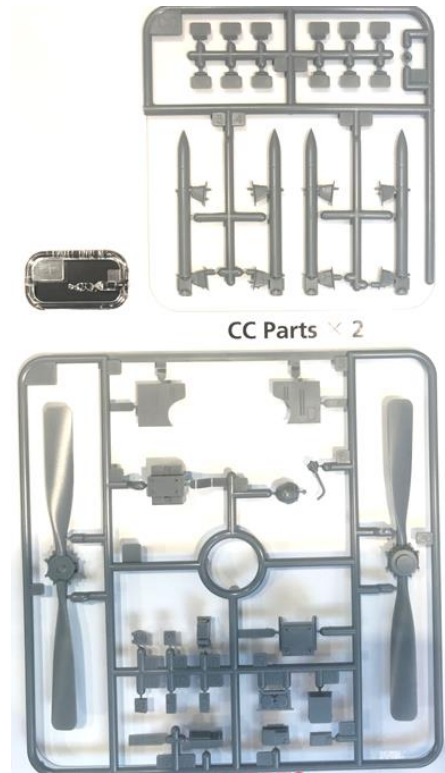

- This is a 1/32 scale plastic model assembly kit. Length: 308mm, wingspan: 354mm.
- The familiar form of the F-51D is recreated in style and accuracy, thanks to extensive study of actual Mustangs, with fine details such as panel lines and rivets.
- The six wing machine guns feature individual parts for ammunition belts.
- Underbelly radiators have depictions of interior structure. Radiator and oil cooler flaps are moving parts.
- Choose whether to display the kit in flight or parked (can be changed after assembly), with dedicated landing gear parts included. The tail wheel is attached via magnet.
- Moving ailerons, rudders and elevators use metal shafts and photo-etched parts. Flaps are also movable, thanks to poly caps.
- Magnet-attached engine cowls are moulded in appropriately thin plastic.
- Features a 16-page full colour A5 booklet packed with information, and a dedicated four- language cover story.

## WHAT'S NEW?

- Parts are included for six 5-inch HVAR rockets.
- The wider paddle blade propeller is accurately recreated.
- Features a choice of SCR-522 transceiver with BC-453B receiver, and new AN/ARC-3 transceiver set. Each has dedicated cockpit parts.
- New parts depict slitted fuselage side radiator access panel.
- Comes with seated and standing pilot figures, the former with new head parts featuring the P-1A helmet used in the Korean war.
- Comes with three marking options (two U.S. and one Korean)

# 87203 Masking Tape with Plastic Sheeting 150mm

This is a smaller version of the popular Item 87164, perfect for use when working on static models such as 1/24 cars. The combination of masking tape with opaque plastic sheet attached allows you to mask with precision, using the sheeting to cover larger areas and save time otherwise taping the entire section

- Masking Tape with Plastic Sheeting 150mm Roll x1
- Polyethylene sheeting is resistant to paint, minimizing the risk of any seeping through.
- The width of tape and sheeting combined is 150mm. Length: 10 meters.
- Sheeting is a double layer, and can be cut apart if a wider piece is required.
