**NEW RELEASES AUGUST 2017**

## ABT703 DAMAGED MAGAZINE 02

4.95€

English / Spanish  
80 pages

The highly positive reception of the first issue of Damaged magazine gave us extra motivation to prepare an even better Issue, Number 2. In this new publication you will again find comprehensive articles dealing with a sheer variety of subjects from different modelling genres. The main goals of publishing this selection are to explain the techniques used by the best modellers from around the world, and show that modelling and weathering have many faces, some of which may be surprising for the reader.

What makes Damaged different from other magazines, are its unique contents. In this issue you will learn how to paint and weather a piece of construction equipment, an aerobatic aircraft, a Gundam mobile suit or an X-wing fighter, as well as how to create a sea base or a Walking Dead scene! And that's not all we have for you this time...
